

# Sun Room

# QUANTAL

A CONSERVATORY ON THE OUTSIDE, AN ORANGERY ON THE INSIDE

Designed to create living space

# The perfect combination

The innovative new Sun Room by Quantal combines the outstanding internal aesthetics of a traditional Orangery with the simple construction of a conservatory. **The end result is a grand design for a fraction of the cost.**

## Affordable and flexible

The factory fabricated Sun Room roof kit emulates a traditional Orangery but offers a far more affordable and flexible solution.

Based on the BBA accredited Quantal aluminium conservatory roof, the Sun Room roof kit achieves the Orangery look without adding significant weight to the structure.

This not only makes it more affordable, but opens up opportunities in the replacement market by enabling you to offer a new roof and create a brand new contemporary living space without any additional construction work.

The Sun Room can be built off existing framework so the conversion from conservatory to Sun Room couldn't be easier and takes just a few simple steps.

Pre fabricated for simple installation

# QUANTAL

## Simple construction

The new Sun Room kit is built on the standard Quantal eaves, or can be upgraded to the Quantal Box Gutter eaves to incorporate an external aesthetic of a soffit and fascia detail. Engineered to work in tandem with the existing eaves solutions, the stainless steel brackets twist fit into the aluminium extrusion.

The NEW internal detail is built around bespoke ply timber webs, pre cut to accommodate the fast fit internal structure with cut outs for cable access and for Heritage cladding when specified. Once assembled you are then ready for the plasterboard finish.

## Kit specification

- 300mm internal soffit width
- Designed for a 25° roof pitch
- Stainless steel brackets
- Bespoke timber webs pre cut for cable access
- Optional external soffit and fascia detail
- Optional heritage cladding (Internal)

Achieving an orangery look for little more than the cost of a conservatory
