YOUR GUIDE TO WINDOWS

You would be astonished at what modern day PVC-U windows can do for your home. Enhanced efficiency, security, practicality and style are all guaranteed when you invest in new PVC-U windows.

Not only are modern day windows 55% more efficient than those manufactured 15 years ago, but they are also now available in an extensive range of styles, including sash windows that are even suitable for period properties and buildings.

The practical part

Security levels have been enhanced through the use of advanced shootbolt locking systems, key locking handles and high security hinges for ultimate safety. Added to that practical features such as water tightness have been improved through the development of integrated gaskets that won't move and hence leak. In short your ultimate in style, quality and security.

Window styles

Choose from the clean straight lines of our chamfered suite, or the elegant curves of our sculptured suite then create a made to measure window in your chosen style.

WINDOW OPTIONS

A summary of benefits

- Styles to suit all properties
- 55% more efficient than old PVC-U windows
- 60 & 70mm chamfered or 70mm sculptured windows
- Enhanced security
- No leaky gaskets
- Low maintenance
- 30 year life expectancy
- New coloured options
- Attractive glazing range
- Integrated blinds now available

Personalise your window

What better way to add character to your windows than by personalising them with your choice of glass. Go for that authentic feel with Georgian Bar or Astragal Bar, get that period look with lead, add a feature with bevels...or just keep it simple with plain glass.

Encapsulated blinds

Combining practicality with the utmost style our innovative encapsulated blind system has added a contemporary new twist to our windows.

Our encapsulated blind system basically means that your blind is cleverly sandwiched between the two panes of glass that make up the double glazed unit. This ingenious concept provides a clean contemporary finish to any room and eliminates the hassle and significant expense of purchasing blinds separately.

Add some colour

There was a time when PVC-U windows were available in white...or white; but not any more. You now have the choice of a range of colours that are applied by a grain effect foil. Not only does this give you more choice, but also offers a more authentic finish that will remain untarnished for years.

Chartwell Green	Hazy Grey	Slate Grey	Anthracite Grey	Black Brown	Agate Grey	Antique Oak	Rosewood
Anthracite Grey (Flat)	Steel Blue	Dark Red	Dark Green	Cream (PX)	Irish Oak	Siena PR	White

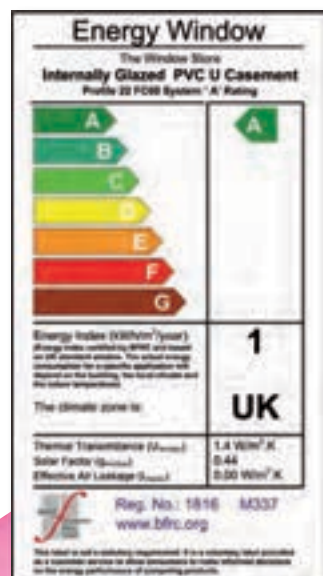

UNDERSTANDING WINDOW ENERGY RATINGS

I'm sure you are familiar with the energy rating symbol that is used to rate the efficiency of fridge's, washing machines and other electrical items; well, now similar ratings have been introduced for windows.

The aim of Window Energy Ratings (WER's) is to provide you with a simple comparison of how energy efficient windows are. Windows are rated from A to G with A being the most energy efficient.

All our fully glazed windows are fully compliant with the latest CE Marking regulations.

Only windows rated C or above are considered best practice by the Energy Savings Trust, an independent, non profit making organisation with the aim of cutting CO₂ emissions by promoting the sustainable and efficient use of energy.

A simple choice

As a trusted local supplier we pride ourselves on offering our customers the most up to date and energy efficient products.

At a time when fuel bills are rocketing and there is increased pressure on us to lower our carbon foot print, Window Energy Ratings are becoming vital.

Our homes account for over a quarter of all CO₂ emissions and by replacing your windows with energy rated windows you can reduce your fuel bills as well as saving in CO₂ terms the equivalent of a jumbo jet flying from London to New York.

TAKING A SUSTAINABLE APPROACH

We are all under increased pressure to consider our actions and take steps to lead a more sustainable lifestyle whether it is reusing carrier bags in the supermarket, recycling waste or saving electricity.

As a respected local business we take our environmental responsibilities seriously. Through our supplier we are one of the few companies in the UK to recycle both manufacturing waste and old PVC-U windows. All products are recycled at the end of their life and the materials are then used in new products creating a continual cycle.

By bringing thousands of tonnes of old PVC-U products back into use instead of sending them to landfill we are giving each product a potential lifespan of 350 years making PVC-U the most sustainable material available.

Do the right thing

We are continually making steps to reduce the impact our business practises have on the environment and ensure our products are sustainable. By choosing one of our products not only will you be getting a quality product backed by a reliable service, but you will also be saving yourself money and doing your bit for the environment.

Sustainable facts

Our homes account for 27% of the UK's carbon emissions

Energy rated windows will reduce your carbon emissions

30% of your homes heat could be lost through old windows & doors

Our windows exceed the standards recommended by the Home Information Packs (HIPs)

PVC-U is a fully recyclable material

A and C rated windows will save you money on your fuel bills

A CHOICE OF ENTRANCE DOORS

Your front door is an important part of your home. Not only does it play a huge part in the security of your property but it creates a first impression for anyone who visits. We can supply a complete range of PVC-U and Composite doors, all made to suit your exact requirements and with the highest levels of security as standard.

Composite Doors

Combining ultimate strength, advanced efficiency and superior style, composite doors offer you uncompromised quality. Designed to replicate traditional doors, composites have the authentic style of timber doors but with all the low maintenance and durable qualities of PVC-U.

- Available in nine colour options
- Choice of glazing designs
- Nine styles to choose from
- Choice of hardware
- Thermally Efficient

PVC-U Doors

PVC-U entrance doors offer the most extensive choice of styles and glass designs making them incredibly versatile. Whatever the style of your home you can be certain you will find a suitable door. Added to that the quality of our doors is second to none, every door is manufactured to industry accreditations.

- Over 20 styles to choose from
- Extensive glazing options
- White or woodgrain finishes
- Virtually maintenance free
- Will not crack, peel or fade

The whole look and layout of your home can be totally transformed by the effective use of doors. Used in the right situations doors can add space, style and floods of light.

French Doors

Get that continental feel with French Doors that open up to make your garden part of your home, perfect for sitting back and relaxing on a summers evening. These popular doors have become a top seller due to the perfect combination of practicality and style.

- Coloured finishes to match your window profiles
- Made to measure
- Multi point locking
- Matching handles to both doors

Bi-folding Doors

The latest innovation and a must have for those seeking the ultimate in contemporary style are bi-folding doors. The concertina folding mechanism means the doors stack tightly to the side to create a totally unobstructed space, and when closed they provide a contemporary glass façade offering panoramic views.

- The ultimate style
- Available in PVC-U or aluminium
- Supplied in almost any colour

Patio Doors

Perfect as a room divider or an entrance in their own right, patio doors add a light airy feel to any property. The easy glide track makes them easy to manoeuvre and the sliding action makes them excellent when space is a concern. Available with a midrail and letterbox they can be used as a front entrance.

- Smooth sliding action
- Tailored to suit your style
- Available in 2, 3 or 4 pane options

The whole look and layout of your home can be totally transformed by the effective use of doors. Used in the right situations doors can add space, style and floods of light.

EXTEND YOUR HOME WITH THE PERFECT CONSERVATORY

Gone are the days when a conservatory is just considered a non descript summer room filled with wicker furniture. The last decade has seen huge developments in glass technology and structural capabilities which means your conservatory can be an all year round useable room; dine, entertain, work, play or just relax... whatever you choose to do your conservatory can make the ideal space.

Our helpful staff will give you the guidance and advice you need to create the perfect conservatory.

THINGS TO CONSIDER

Style & Size **A**

Conservatories come in a complete array of styles all you need to do is think about which you prefer and which suits the style of your property. All conservatories are made to measure depending on the space available.

Lean-to

Edwardian

Gable

Victorian

Combinations

Colour **B**

Your conservatory can now come in a range of different colours so you can create the perfect look to compliment your home and surroundings.

Black

Dark Green

Grey

Cream

Irish Oak

Antique Oak

Rosewood

Sage Green

White

Ventilation **C**

Roof vents and fans are both efficient ways to ventilate your conservatory. The level of ventilation required will depend on the direction your conservatory faces. Heat reflecting blue glass will help keep your conservatory cool in summer.

A summary of benefits

- An all year round usable room
- Hundreds of styles & shapes
- CAD service with free multi view drawings
- Made to measure
- Tailored to your requirements
- Knowledgeable advice
- Low maintenance & durable
- Porches also available

Windows **D**

Consider whether you want the windows in your conservatory to open, if so do you want top openers or side openers? Do you want clear glass or patterned?

The Roof **E**

The roof is a major part of your conservatory and you have a few options: cost effective polycarbonate, heat reflecting blue glass, self-cleaning glass, insulating clear glass or even a solid roof.

Doors **F**

French, patio or bi folding doors are all suitable for your conservatory it's just down to individual taste. See page 9 for features and benefits.

PRACTICAL PARTS GUTTERING & DOWNPIPES

Everyone wants their home to look good but more importantly it also needs to be fully functional which means thinking about aspects which may not be so obvious such as your rainwater system. It may be out of your eye line but your guttering and down pipes are essential for the drainage of your home. If you leave faulty guttering in place it can lead to all kinds of serious problems.

The guttering on your home is designed to carry rainwater away from the building, therefore if it is defective in any way it can be the source of many sorts of damp problems, and if it is not properly maintained the water can run down the outside wall causing mould growth, ruining the paintwork and ultimately causing serious structural damage.

Top tip

- A** If water is leaking over the top of your horizontal guttering it is likely it is blocked. You will need to remove any debris asap... leaves are usually prime culprits!
- B** To prevent future blockages invest in leaf guard.
- C** The best time to check for leaks is when it is raining. If you see any leaking water from downpipes get them checked by a professional urgently.

Why choose PVC-U guttering?

- Much more economical
- Easy to install
- Easy to replace sections
- Strong and durable
- Will not rust
- Available in a range of colours

ADD THE FINISHING TOUCHES

Top Tip

- If you are replacing your guttering check your soffits and fascias as it is much cheaper to get them done at the same time

Roofline

Our low maintenance pvc-u roofline products will not only enhance the look of your home but they are incredibly low maintenance so will stay that way for years to come without the need for sanding or painting.

Our product range includes fascia boards, cellular boards, cladding, soffits and architraves all of which come in a choice of white or a choice of wood grain effect finishes and will not suffer from discoloration problems.

If you want to smarten up the appearance of your home and add the finishing touches speak to us and see what a difference we could make.

The benefits of PVC-U roofline

- Low maintenance
- Cost effective
- Weatherproof
- Will not rot, crack or peel
- Lasts for years

GUARANTEED PEACE OF MIND

Home improvements are an investment, when carried out professionally they will add value to your property as well as significantly improving your lifestyle whether it be adding extra space, improving thermal efficiency, making the layout more practical or just making your home more stylish.

Despite the significant benefits no investment should be taken lightly. Effective home improvements require careful consideration, professional advice and skilled workmanship. Don't compromise; you want to be confident that you are getting the best products and the best service, at the best price.

Fully accredited

All of our products are fully accredited to industry standards so quality is guaranteed. Every product is manufactured in our state of the art factory which houses some of the most technologically advanced equipment available.

When you choose our products and our service you will only get the best.
